Vol. 7, No. 2

July 1997

NCOA Saves Millions in Mailing Costs

Printed with permission from the US Postal Service. *memo to mailers* Vol. 32, No. 5. Washington DC: US Postal Service Corporate Relations.

Over 40 million Americans change addresses annually, which creates formidable obstacles in maintaining a high quality mailing list that tracks customers who move. The National Change of Address (NCOA) makes change-of-address information available to help reduce undeliverable or duplicate mailpieces. The NCOA service is a comprehensive program that aids mailers in identifying changes of addresses before mail enters the mailstream.

USPS Manager, Address Management Michael Murphy said, "The NCOA service helps mailers reduce undeliverable-as-addressed mail by correcting mailer addresses prior to mailing.

"Since 1986, NCOA has saved millions of dollars that otherwise would have been wasted in materials and postage."

The service is provided by certified, licensed vendors, who receive updated, computerized change-of-address information every two weeks. This process improves mail deliverability by providing mailers with current, standardized five-digit ZIP Codes, four-digit add-on codes,

and two-digit delivery-point coded addresses for individual, family and business moves.

The address information provided by a mailer to the NCOA licensee is first standardized to conform with USPS requirements including the ZIP+4 Code.

Once the address has been standardized and the ZIP+4 Code applied, an attempt is made to match the address against the NCOA file containing about 106 million records or 36 months of address changes filed by relocating postal customers.

If an exact match is made with the old address information in the NCOA file, then the NCOA licensee is permitted to provide the updated information.

NCOA Benefits

NCOA provides the following benefits to mailers:

- Reduces undeliverable mail by providing most current address information for matches made to the NCOA file;
- Prevents the need for duplicate mailpieces or re-mailings after address corrections are received, since the address correction is applied prior to the mailing;
- Uses most current address information and lessens mailer costs by reducing the number of undeliverable and duplicate mailpieces; and,

- Provides the opportunity for faster product/service marketing through accurate mail delivery.

NCOA licensees provide mailers with the following:

- The mailer's original address;
- The input address, standardized and appended with the ZIP+4 Code, if possible;
- A standardized new address when the standardized input address matches the old address on the NCOA file that includes a five-digit ZIP Code, four-digit add-on code, and a delivery point code;
- A PS Form 3553, for Automation Discount Qualification; and,
- A National Deliverability Index (NDI) report (breakdown of deliverable address information).

continued on page 2

In This Issue...

- 4 Address Conversions
- 9 ZIP Code Boundary Realignments
- 11 Renumbered Post Office Boxes
- 13 Post Office Changes

continued from page 1

When no address matches are found, licensees return the following:

- The mailer's original address;
- The standardized ZIP+4-coded version of the input address;
- PS Form 3553, Automation Discount Qualification; and,
- National Deliverability Index report.

A no-match to the NCOA file does not return a new address. There is a "nixie" option, which allows mailers to cleanse their mailing list further. The "nixie" option provides a code that is a clue as to why a match could not be made with the NCOA file. The code indicates a match was close but not good enough to meet strict USPS matching guidelines. Mailers can investigate the address record and with better information, try again.

For more information, call the National Customer Support Center at (800) 238-3150. Hours of operation are 7:00 AM through 7:00 PM (Central Time).

Madison Wisconsin ZIP Code Boundary Realignment Update

Effective July 1, 1997, there will be a Madison WI ZIP Code boundary realignment between 53704 and 53718. What is now 53718 will all become 53704. A large area of what is now 53704 will become 53718. AMS has been updated, and notices to the affected customers were mailed on May 1.

USPS Extends Diagnostic Phase of Barcode Evaluator Program

Printed with permission from the U.S. Postal Service.
memo to mailers Vol. 32, No. 5. Washington D.C.: U.S. Postal Service Corporate Relations

The USPS extended the diagnostic phase of the Automated Barcode Evaluator (ABE) program beyond May 15. Anita Bizzotto, Manager, Business Mail Acceptance said, "Although there has been significant progress in deploying ABE, and we have been absolutely delighted with the new software modifications, the data gathered during the current diagnostic phase shows that an additional modification is needed to assure the machine is operating at the optimum level. We will continue in a diagnostic mode until we are confident that ABE performs at the highest degree possible. A new implementation schedule will be announced as soon as we know when the necessary modification will be completed."

Pompano Beach/Fort Lauderdale FL Realignment Postponed 'til '98

The proposed 3-digit ZIP Code realignment for Pompano Beach/Fort Lauderdale Florida, which was scheduled for July 1, 1997, has been postponed until July 1, 1998. This event involves SCFs 330 and 333. The postponement is at the request of the South Florida District.

Graceful Moves

How the USPS Tracks Address Changes

Printed with permission from the U.S. Postal Service. *Mailers Companion*, Vol. 2, No. 5, May 1997. Washington D.C.: U.S. Postal Service Marketing Systems.

When you move, you want to receive your mail without a break in service. All it takes is a special postcard.

Filling out a change of address order (Form 3575) is the first step toward uninterrupted mail service. This order (also called a COA) is a simple postcard. It's printed in the booklet called *Mover's Guide™*. You can find an automated letter version of the form on the Internet as Form 3575-WWW.

Carriers and Computers

The COA order goes to the carrier who delivers mail to the old address so that the COA can be validated. The carrier also notes the change on a reference card kept at the carrier's sorting case.

The carrier then sends the COA order to the Computerized Forwarding System (CFS) unit that forwards mail from the old address ZIP Code. For example, if a person moves from Detroit to Miami, the COA order is sent to the CFS unit in Detroit, no matter where the order is actually filed.

Each postal customer who files a COA order gets an extract code. This code consists of the first four characters of the customer's last name or business name and the last three digits of the old address. For example, the extract code for Ralph Perez, 1234 Main Street, is "PERE234."

The CFS unit enters the COA under the old ZIP Code using the extract code as a reference key. The computer system adds a ZIP+4 code to the new address. At this point, the CFS unit is ready to forward the customer's mail.

The CFS unit returns the Form 3575 to the delivery unit. The form is kept there for 18 months from the end of the month in which the change takes effect.

NCSC and NCOA

Each night, the National Customer Support Center (NCSC) contacts the 217 CFS sites through modems and downloads copies of all the COAs entered into the CFS databases that day.

These COAs update the National Change of Address (NCOA) master file.

The NCSC compiles the COAs every 2 weeks. The COAs are checked through several quality control routines before the records are added to the NCOA master file. Some of the edit checks answer these questions:

- Is the COA a temporary move rather than a permanent move?
- Does the new input address have a valid ZIP+4 code?
- Is each required field on the COA properly filled out?
- Is the COA part of a multiple move that requires "chaining" as follows:
 - A-B-C (chain all COAs)?
 - A-B-A (delete original COA)?
- Is the COA a duplicate of a COA previously entered?

At the end of the 2-week period, the NCSC produces a "clean" updated file and compares it against the then-current master file.

Again, edit checks are run and discrepancies are investigated and resolved before the file is distributed to the 23 licensed vendors.

The licensed vendors must then update their copies of the NCOA file within 3 working days. They also report the new total to the NCSC within 2 days of the updating. Within a 2-day margin, the NCSC and the vendors have identical copies of the NCOA file.

You can get Form 3575-WWW (automated letter for printing) on the Internet at <http://www.usps.gov/moversnet/coa.html>. Or, get Form 3575 (postcard) at any post office or in the *Mover's Guide™* booklet.

— Michael Murphy, National Customer Support Center

Address Conversions

The following is a list of ZIP Codes within which all or some of the addresses have been changed due to local government action. The Postal Service has agreed to use these new addresses as mailing addresses. Should a mailer wish to obtain the new addresses for customers in the affected ZIP Codes, they may contact the respective delivery unit, the Address Management Systems office serving that area, or any LACS licensee. We also recommend that you review the information posted on the Rapid Information Bulletin Board System (RIBBS) via our toll free number, (800) 262-9541 or via the internet at <http://ribbs.usps.gov>. This information can be found on RIBBS under the Address Management Menu, item 1—text files LACSZIP.TXT, LACSZCHG.TXT and LACSMGMT.TXT.

Renumbered Post Office Boxes

The following lists post office boxes that have been renumbered. The Old Range is the range of PO Box addresses prior to renumbering, and the New Range is the range after renumbering. If the numbering change coincided with a ZIP Code change, the newly assigned ZIP Code appears in the New ZIP column. The Continuity column indicates whether the renumbering was accomplished only by changing or adding leading characters. If that was the case, Y appears in the Continuity column.

OLD ZIP	NEW ZIP	OLD RANGE		NEW RANGE		CONTINUITY
